Always Saved Humanity,
If You Want To Be One
Among These Saviours”**

BACHELOR OF AYURVEDA MEDICINE & SURGERY

BAMS stands for Bachelor of Ayurvedic Medicine and Surgery. BAMS is an undergraduate degree programme designed to make students familiar with the concepts of Ayurveda and use them for the treatment of patients. BAMS incorporates Ayurveda with the ideas of modern medicines, and students are taught a combination of both as part of the course curriculum.

Ayurveda is one of the oldest systems of medicine and traces its roots to Vedic times. It is based on the curative properties of herbs, and its treatments are known for the natural elements they contain. Considered an alternate treatment method, the Ayurveda medicine system not only cures and prevents an ailment but also reduces the frequency with which diseases enter the human body. It utilises the self-healing system of the body.
